

Give new car buyers a different car buying experience

Give new car buyers a different car buying experience

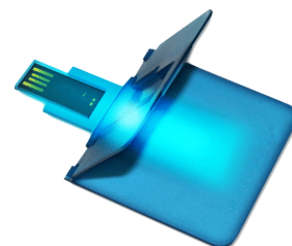

Show your potential car buyers what you can do for them and drive more auto sales. With the Dream Card, an ultra-thin USB flash drive, auto dealers can showcase vehicles and compel buyers who normally avoid dealership visits to come in and test-drive new cars.

Be the first to offer a Dream Card. Let our creative team show you how to increase new card sale this year.

The full-color Dream Card can be used to:

- Feature a new vehicle
- Hand out as a business card
- Promotional gift for test drive
- Distribute vehicle information
- Store car sale and loan documents
- Auto maintenance service records
