## Introducing the iBiz Cloud Business Card

Are you a Business executive? Do you offer information to your clients in the form of brochures, documents or files? Would you like to give your clients a more efficient way of providing info? Would you like to grab an effective selling and marketing tool?

Just imagine having a simple system with which your clients can access your product's information or data anywhere they want. Just imagine a digital card equipped with a QR code and they can access everything with only a Smartphone. Cool isn't it?

Now you can offer your customers an amazing business card with the company information preloaded in the cloud!
