Wireless card now available

## Cloud Technology

Just imagine having a simple system with which your clients can access your product's information or data anywhere they want. Just imagine a digital card equipped with a cloud port, wireless chip, and QR code. They can access everything with only a Smartphone. Cool isn't it?

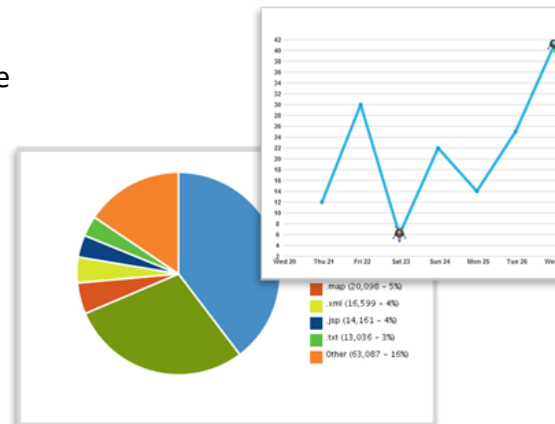

- True plug-and-play technology
- An ultra-thin business card design.
- Cloud Storage, data can be updated any time
- Analytic Report
- Secure, cannot be altered by customer
- Large imprint area for graphics, text and logos
- Affordability

## Tell Your Story and Track Your Success

Are you a Business executive? Do you offer information to your clients in the form of brochures, documents or files? Would you like to give your clients a more efficient way of providing info? Would you like to grab an effective selling and marketing tool?

iBiz cloud report also gives you a history of user demographic and access frequency.

Now you can offer your customers an amazing business card with the company information preloaded in the cloud!
