*Charge and re-charge multiple devices with the iMojo portable power provider*

## When You're on the Go With iMojo, There's Never a Disconnect

Yes, the iMojo is slim. The iMojo is sleek. The iMojo is VERY attractive. But what makes the iMojo true to its name is the fact that it really does have magical power. This high power battery charger offers four times more charging capacity than the average portable battery charger, which generally supports just a single mobile phone re-charge. And with two charging ports, users don't need to choose between devices. The iMojo's design also provides generous surface area for your logo. More power and more powerful branding; that's iMojo.

Available in 4 colors – Black, Silver, Red, Blue.
