

When Every Second counts, **Wrixo** Delivers Share Crucial Health Info **Instantly**

Give Access to Life-Saving Medical Info

The wireless Wrixo wristband enables first responders, doctors and nurses to access your health information in real time.

Share Your Stats Wirelessly In Just [One Tap]

Emergency personnel can view info easily by tapping Wrixo to their phone or tablet or by scanning its QR code.

Stay HIPAA Compliant

Include only the medical information you choose to share and allow doctors to provide data that you approve.

Worry-Free Wear and Tear

Durable and waterproof, Wrixo looks good on your wrist but is rugged enough to withstand daily use

Wristband That Save Lives

Keep Critical Medical Records Close at Hand

Medical Emergency Wristband

The WRIXO band gives user a convenient way to keep their personal and medical information safe and within reach. The WRIXO gives doctors or medical technician quick access to “user approved” information they need to provide accurate emergency care. That’s where the WRIXO wristband can be lifesavers. Unlike traditional USB flash drives or printed devices that are easily lost and cumbersome to use during emergency. Doctors or emergency responders can simply tap their smartphone on the WRIXO or scan the QR code from their smart phone or computer to access

For Users

Tap or Scan, and Update!

Updating medical information as easy as scanning or tapping on the WRIXO wristband and enter your personal identification code.

User simply enter his or her personal information and select the information wishes to share with medical responders.

Built-in Wireless Chip and QR Code with Unique user ID

Unique Patient QR Code

For Doctors and EMT (Medical responder)

Scan or Touch and Retrieve!

Retrieving medical information as easy as scanning or tap the WRIXO wristband from your mobile device. WRIXO is also available in ID card, key chain, and pendant device.

Call your distributor for more information about how WRIXO works.

ASI 62222 | PPAI 508496 | SAGE 69147 | DC 462110

STEP 1: User enters personal information and choose what he or she wishes to share with medical responders.

Invite

User sends an invitation to his or her doctor to enter basic medical information that medical responder needs to know

STEP 2: Medical responder scans the WRIXO QR code or tap with smartphone **wirelessly** and only the information **CHECKED** will be visible.

Scan from PC or Mobile device → Verify User → View info
