

NEW!!

Transform Your Image with the [iBiz] Wireless Business Card

This innovative, compact business card delivers content to your customers' smartphones wirelessly. It's the smartest way to make an impression on today's tech-savvy consumers.

[TAP] Into Wireless Technology

To access content, recipients simply tap the card with their wireless enabled smartphones. It's that simple. And wireless functionality removes the need for a USB port or QR code scan.

Video Business Card

Deliver Instant Access to Your Content

Users can view a YouTube video, visit a website, dial a contact number, open and save contact information to their phones, connect to social media and receive personalized messages.

Actionable business buttons

Update and Host Content With Built-in Cloud Storage

The wireless iBiz uses the same cloud technology as Industry's exclusive, highly popular iBiz Cloud business card.

Attract Attention with Color Imprinting

What's on the outside matters too, so you'll have plenty of space to advertise your brand in full color.
